

APPLICATION HISTORY

Atlas Minerals
Pandora Mine--ACT/037/012
San Juan County, Utah

May 1975	Existing mine prior to May 1975.
January 5, 1977	Preliminary mine plan submitted.
January 17, 1977	Inspection made by Ron Daniels.
January 21, 1977	Additional information on MRP submitted.
February 7, 1977	Revised plans submitted.
February 16, 1977	Date of Public Notice placed in newspaper.
April 20, 1977	Final approval given.
January 12, 1978	1977 Annual Report received.
January 23, 1979	1978 Annual Report received.
January 24, 1980	1979 Annual Report received.
December 29, 1980	2.5 acre bore hole amendment requested.
January 2, 1981	Division (Jim Smith) request for updated map and plan as well as annual report.
April 23, 1981	Inspection of exploration sites on Pandora project made by Tom Tetting.
December 17, 1981	Hydrologic and oil reclamation inspection made by Vicki Ketvirtis and Sally Kefer.
February 3, 1982	1981 Annual Report received.

SURETY ADDITION AND UPDATE

Pandora Mine--ACT/037/012
San Juan County, Utah

The 2.5 acre bore hole amendment requested on December 29, 1980, should be covered by an additional surety amount calculated as follows:

1. Clean-up and plugging of bore holes, Lump Sum--\$4,000.
2. Excavation and earth movement by dozer--\$1,400/day, one day.
3. Revegetation--\$250/ac, 2.5 acres = \$625.
4. Monitoring--\$175/ac, \$440.

The original sum calculated for the original 12.1 acre minesite in 1982 dollars would be \$5,743.00. Added together with the sum calculated for the new bore hole disturbance, this amount becomes \$11,708.00. For an additional five years of mine life as originally estimated (10 year mine life in 1977), incorporating the currently used 13 percent inflation factor, this becomes \$21,571.00, the new surety estimate.
